

# P7H-TERM 2-NEWSLETTER

## THIS TERM IN P7H

This term we are exploring new concepts in maths, literacy and science.

We are looking at multiplication and division (including fractions and decimals) and how the numbers relate to one another in different ways. In Geometry we are exploring circles - including identifying varying parts, formulas and how to use these formulas accurately.

In science, we are exploring hydrolics and learning about the physics concepts of push and pull are connected to the movement of machinery. Pupils have made a working crane and are going to be building a working lift next.

In writing we are continuing with poetry and are currently working on writing a humourous poem; in connection with this type of poem we will be exploring the impact of stanzas, uneven lines and anaphora has on the reader. With the intention that the pupils use these techniques in their own writing.

In our World War 1 topic we will be learning about the remaining significant battles and the eventual ending of the war.

## CLASS QUESTS - METASKILLS - UPDATES

**FUNDRAISING EVENT PLANNING** - we are revving up for our Christmas Enterprise - which is beginning next week; please check your emails for information about the various events.

**ARNHALL MOSS QUEST** - we have been very excited this week as we have received two responses for supplies from B&Q and HUWS.

**INTERSCHOOLS SPORTS EVENT** - Our visits and presentations to schools has been successful - we have confirmed the following school engagement - Crombie, Skene, Dunecht, Echt and Kinellar.

**TECHNOLOGY FUNDRAISING** - This quest is still in its infancy. The team were required to change the focus of the group; but they have adapted and have shown real resilience and determination.

## UPCOMING EVENTS
